

Create Trio in 'Picasa'

Open Picasa – (double click on desktop icon)

Pick from the folders section where you have the trio images stored.

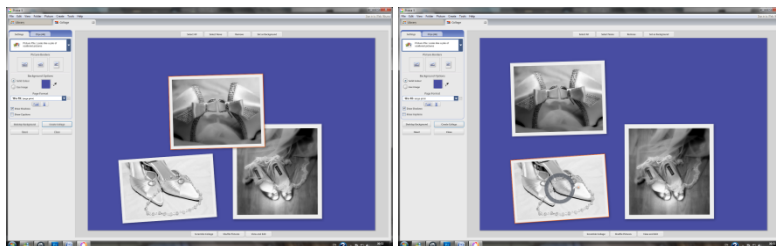

Ctrl click on the three images to select them they will have a blue line around them when selected

Go to tool bar at top of screen

Click on create

Select picture collage

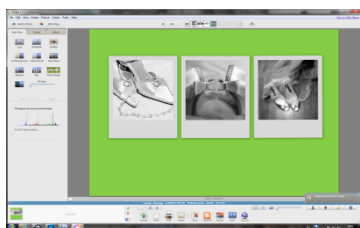

Your images will open together on the main screen.

You can drag around the screen to position them where you want them, click on the image to be moved and when the cross appears you can move to the desired position

You can also resize them at this stage, when the circle appears you can change the size by pulling one way or the other.

You have the options to change back ground colour or add borders at this stage also

when you are happy with this click on create collage.

In the basic fixes you may crop, add text, and create numerous different effects.

If you wish to print, go to file, print, check your printer settings.....PRINT

If you wish to save, go to file, save as, and select the desired folder.
