Picasa 2: Initial Picture Scan

Picasa is ready to scan for pictures on your computer

Completely scan my computer for pictures

Choose this option if you have pictures stored in various folders across your computer, especially if you have pictures stored on more than one hard drive.

Only scan My Documents, My Pictures, and the Desktop

Choose this option if you only store your pictures in the above folders.

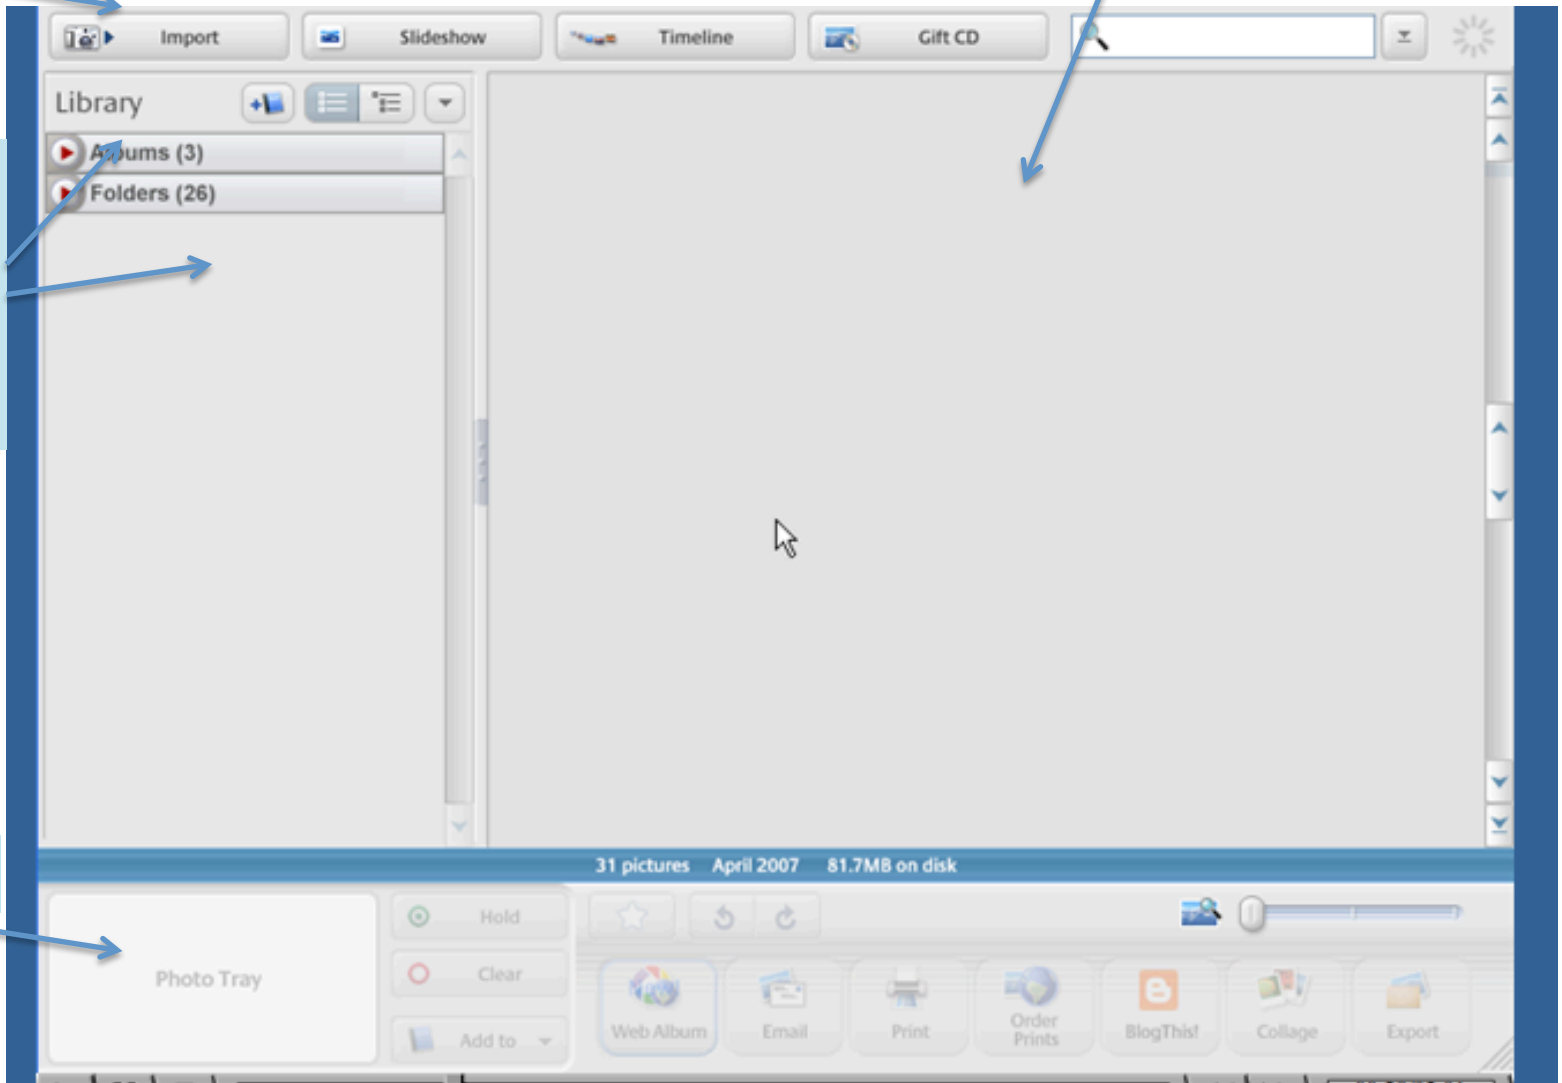

Scanning for pictures never moves or copies files to new locations. Picasa's Folder Manager (available from the Tools menu) will let you modify which folders are displayed by Picasa.

Albums and Folders

- Folders represent the actual folders on the disc on your computer. If you delete a folder in Picasa you will delete it from your computer.
- Albums can be created within Picasa. They are collections of images from folders on your disc. If you delete an album in Picasa you do not delete the images from your computer.

Creating Albums

- Select the image(s) from your chosen folder. See them added to the Photo Tray bottom left of screen.
- Press Create new album from blue icon
- Name and give a description and save.

Editing your image

- Double click the image you wish to edit.
- Choose from the palette on left hand side and choose the appropriate tool. If, after manipulating the image you are not pleased with the results, you can dismiss the changes and reset your image as original.
